Profile

Computer Science student with Swiss, Russian, and American citizenship and strong experience in frontend & backend development, data visualization, and educational support. Proven ability to deliver efficient, scalable code with a focus on performance and clarity. Passionate about turning complex data into meaningful insight.

Experience

- Mar – Jul 2024 **Front-End Data Visualization Engineer**, *Effect Healthcare*, Amsterdam, Netherlands
 - Built a clinical pathway mapper with **D3.js**, optimizing performance and memory use.
 - Conducted research comparing **OOP vs FP**, and **Tuples vs Objects**.
 - Collaborated with senior developers; used **Wallaby** and **Karma** for testing.
- Jul – Aug 2023 **Data Engineer Intern**, *Oxaigen*, Amsterdam, Netherlands
 - Developed a PostgreSQL database with **Docker**, **PSQL**, and **Bash**.
 - Merged schemas from multiple sources and automated database initialization.
- Mar – Jun 2023 **Backend Developer Intern**, *Mozo*, Amsterdam, Netherlands
 - Built backend using **Node.js**, **TypeScript**, and **PostgreSQL**.
 - Designed APIs and simplified DB interactions during a team hackathon.
- 2022 – 2023 **Teaching Assistant — Computer Science & AI BSc Programs**, *Vrije Universiteit Amsterdam*
 - Supported programming and HCI courses, mentored students, graded assignments.
- Jun 2019 **Data Analyst Intern**, *United Nations Office at Geneva*, Switzerland
 - Automated monthly reports using **Python (pandas)** to aggregate CSV data.

Education

- 2021 – 2024 **BSc in Computer Science**, *Vrije Universiteit Amsterdam*
- 2019 – 2021 **International Baccalaureate Diploma**, *International School of Geneva*

Projects

- Manga Downloader Python (Kivy) app for downloading/reading manga in English and Japanese (Android + PC).
- Kanji Study App Study tool for Japanese B kanji in the IB curriculum using Python/Kivy.
- Neocyber Runner Endless runner game built in Unity (C#), available for PC and Android.

Skills

- Languages Python, Java, TypeScript, JavaScript, SQL, C++
- Frameworks React.js, Node.js, Docker, D3.js, Git, Bash, Karma
- Data Tools pandas, matplotlib, BeautifulSoup, seaborn, scikit-learn
- Other Unity (2D/3D), Postgres, Adobe Photoshop/Illustrator/XD, Kivy

Languages

- English Native
- French C1 listening, B2 other skills
- Japanese B1/B2
- Spanish A2
- Russian A1
